Symmetry Practice

Directions: Draw the "mirror image" to complete the *symmetrical* design.

The activity consists of a 4x3 grid of shapes. Each shape is positioned to the left of a vertical line, representing the left half of a symmetrical design. The student's task is to draw the right half as a mirror image. The shapes are as follows:

- Row 1: A shape with a flat top, a notch on the left, and a wavy bottom edge.
- Row 2: A shape with a jagged, sawtooth top edge and a flat bottom edge.
- Row 3: A shape with a curved top edge, a notch on the left, and a jagged bottom edge.
- Row 4: A shape with a curved top edge, a notch on the left, and a wavy bottom edge.

The middle cell (Row 2, Column 2) contains a hand-drawn example of a symmetrical shape with a jagged top and bottom edge, and the word "example" written below it.
